

Documenting post-action memorandum changes

After the action memorandum is signed, new information may be received or generated that could affect the implementation of the action. The information could be identified at any time during, immediately prior to, or after the implementation of the removal action. Except for removal actions involving special circumstances, (i.e., statutory exemption request, ceiling increase request, and request for changes in the scope of response), the OSC will consider and may modify the action. Such changes will be documented in the removal action report.
